

MAGNETIC RAIL 24VDC

This high-performance magnetic rail is made of robust aluminum, offering a linear lighting solution combining durability and elegance. Although it uses a 24VDC compatible output voltage for luminaires, it benefits from an optimized design with an input voltage of 48VDC

TECHNICAL SPECIFICATIONS

|               |                               |
|---------------|-------------------------------|
| REFERENCE     | EK-48V1RM5                    |
| MATERIAL      | Aluminium                     |
| INPUT VOLTAGE | 48VDC                         |
| SHAPE         | linear                        |
| GUARANTEE     | 10 years                      |
| CERTIFICATION | ETL, UL, CSA, SAA et CB, ROHS |
